About

I'm a web developer and a backend specialist with expertise in web-based projects. With over 12 years of experience, I possess a wide range of software knowledge and practical skills. My passion lies in creating innovative solutions that enhance user experiences and contribute to the success of businesses.

I have worked on various projects in the field of web development and utilized my strong analytical abilities to solve complex problems. In addition to backend development, I have a deep expertise in database management, API integration, and performance optimization.

My goal is to continuously improve myself, keep up with new technologies, and deliver solutions that align with the latest trends. I seize every opportunity to specialize in my field and have a constant thirst for learning.
